ABOUT ME

Information Systems student in 7th semester at Bina Sarana Informatika University, with hands-on experience in system development through an internship at PT Padma Soode Indonesia.

Skilled in optimizing business processes and building scalable web-based solutions. Passionate about Information Technology, UI/UX, and Web Technologies to deliver efficient and impactful digital systems.

WORK EXPERIENCE

Fullstack Web Developer | System Development Division

PT. Padma Soode Indonesia - *Bekasi City*

June 2025 - September 2025 (*Internship*)

- Designed a web-based internal audit system using PHP, Laravel, Tailwind CSS, JavaScript, and MySQL.
- Designed a module structure for two types of users: auditors (audit input & field documentation) and admins (verification & data management).
- Designed a simple and responsive user interface (UI) for access across multiple devices, including mobile devices.
- Transformed the audit process from Excel to a faster and more structured digital system.
- Accelerated audit input and documentation by up to 70%, and simplified data management for auditors and admins.

Invoice Administrator

CV. HMJ - *Bekasi City*

August 2023 - Present (*Freelance*)

- Prepare and submit a Cost Budget Plan (RAB) for field project operations, including material requirements such as sand, river stone, and gravel, as well as heavy equipment rental.
- Create and manage monthly invoices for hauling services and heavy equipment rental, with total project billings reaching 100± million Rupiah per month.
- Coordinate with the field team to verify delivery notes, ensuring compliance with material quantities, equipment types, and delivery schedules.

Machine Operator | Mechanical Parts Division

PT. Yamaha Music Manufacturing Asia - *Bekasi Regency*

June 2023 - December 2024 (*Contract*)

- Operated mechanical parts production machines while maintaining strict quality and safety standards.
- Adjusted machine parameters to meet precise product specifications: width 22.50 ± 0.10 mm and length 50.10 ± 0.20 mm.
- Improved cutter changeover efficiency, reducing downtime from 45 minutes to 40 minutes through a Kaizen initiative.
- Proposed 21 Kaizen Teian ideas in a single month to support continuous improvement efforts.
- Awarded Best Anzen Teian for modifying the cutter cover to enhance workplace safety.

Assembly Operator

PT. Chandra Nugerah Cipta - *Bekasi Regency*

August 2022 - February 2023 (*Contract*)

- Conducted inspection and marking of components prior to assembly to ensure only parts meeting quality standards were used.
- Assembled motorcycle handlebars using jigs to ensure proper positioning, angle, and torque according to technical specifications.
- Performed final visual inspection and measurement using tools such as calipers and gauges to verify product compliance with production standards.

ORGANIZATIONAL EXPERIENCE

Head Of The IT Club

IT Club TKJ - Vocational High School 2, Bekasi City

September 2020 - February 2022

- Coordinating over 30 active members in various training activities and technology projects.
- Leading a team in the IoT Smart Agriculture project, as part of the West Java Education Office's (DIK) ICT Literacy Movement (GELATIK) program.
- Developing members' skills through internal workshops and collaboration with Computer and Network Engineering (TKJ) teachers.

EDUCATION

Bachelor's Degree in Information Systems

Faculty of Engineering and Informatics - Bina Sarana Informatika University, Bekasi City

September 2022 - Present

GPA : 3.69/4.00

- Focused on developing web-based systems and digitizing business processes.
- Studied system analysis and design to support operational efficiency.
- Experienced in using tools such as Visual Studio Code, Git Hub, Figma, XAMPP, RapidMiner, and Odoo for digital system development and simulation.
- Deepened understanding of UI/UX principles to create intuitive and user-friendly interfaces.
- Gained insights into automation and system integration to support digital transformation across various business functions.

Computer and Network Engineering

State Vocational School 2, Bekasi City

July 2019 - June 2022

Final Score : 84,73

- Installed computer hardware and assembled local networks (LAN/WAN).
- Configured networking devices (routers, switches, access points) for lab and school projects.
- Handled system troubleshooting in daily and field practices.
- Served as Head of IT and gained hands-on networking experience through training, simulations, and IT Club Projects.
- Completed a final project by developing a Digital School Information System to support school digitalization.
